ABOUT ME

I am a self-taught Full Stack Web and Mobile App Developer with a strong emphasis on front-end development, dedicating the past 4 years to crafting innovative solutions for societal challenges and digitally transforming communities. Fueled by a passion for programming and a commitment to delivering high-quality products that truly impact lives, I bring proven experience in contributing to team success through hard work, dedication, and meticulous attention to detail.

Eager to embrace new challenges, I am a motivated self-starter with a track record of learning and adapting swiftly. Committed to understanding project scopes and tasks thoroughly, I strive to exceed customer expectations by delivering top-notch products. My flexibility and adaptability make me an asset in any role, and I am excited about the opportunity to contribute my skills and enthusiasm to your organization, helping drive your team's success.

EDUCATION

Federal University of Technology, Minna

2018 – 2024 | BSc Mechanical Engineering

Throughout my mechanical engineering degree at a leading technological university in Nigeria, I actively pursued my passion for software development in parallel. While obtaining my engineering qualification, I was concurrently building my software development skills, working on personal projects, building quality websites/apps for clients and companies in and outside Nigeria.

My hands-on experience and dedicated self-learning enabled me to create high-quality applications that effectively met the client requirements, demonstrating my commitment to becoming a proficient software developer even before completing my mechanical engineering studies.

WORK EXPERIENCE

Spotmate

Frontend Web Developer | 2022 -2023

- Redesigned the landing page at Spotmate, a startup focused on a social network site for gym enthusiasts, aligning it with Figma's UI design for a cohesive visual experience.
- Implemented key features including post actions such as adding, liking, and bookmarking, as well as commenting on posts, and incorporated infinite scroll functionality for both feed and profile pages.
- Developed the follow and unfollow feature, enhancing user connectivity within the network, and integrated image cropping functionality before upload to enhance the overall user experience.
- Utilized Next.js and Tailwind CSS to build these features, significantly improving the functionality and usability of the site.
- Acquired extensive experience in web development technologies and frameworks, coupled with a deep understanding of UI/UX design principles.
- Contributed to the overall enhancement of Spotmate's product, demonstrating expertise in front-end development and a commitment to creating high-quality user experiences. Eager to bring this skill set and passion to a new role in the tech industry.

BridgeGap Consults Limited

Senior Full stack Web Developer | 2022 -Present

- Developed and deployed a comprehensive HR and employee management software, individually designing and building the system using Reactjs for the frontend, Laravel for the backend, and MySQL database. The software streamlined HR operations, covering aspects such as employee recruiting, loan and leave requests, payroll, and more.

- Collaborated with another developer to create the frontend of a Job Board and InterviewManagement platform, enhancing the hiring process for companies and providing a seamless experience for job seekers. Utilized Tailwind CSS for frontend design, accessible at link.
- Created a Report application enabling employees to record incident reports within and outside the company.
- Redesigned the front-end of a Housing and Estate Management web application, significantly improving user experience and engagement. The redesign focused on enhancing aesthetics and functionality, making the application more user-friendly and intuitive.
- Demonstrated a diverse skill set in designing, building, and deploying various web and mobile applications, showcasing proficiency in multiple programming languages, platforms, and frameworks. Dedicated to delivering high-quality products, offering valuable contributions to any tech team.

Microsoft Africa Development Center Student League

Software Engineer | 2023 -2024

- Member of MASL chapter at Federal University of Technology Minna, specializing in areas such as web development, APIs, AI, and machine learning.
- Completed tasks and earned certifications in various areas of the program.
- Collaborated on real-life projects like Medlink, an application for recommending medical specialists through AI-driven diagnosis.
- Contributed by integrating the frontend with an AI chatbot and connecting it with the backend API.
- Utilized Microsoft tools and technologies, including Azure, for building and training A.I models.

SearchMedia Radio Station

Full stack Web & Mobile Developer | 2021 -Present

- Managed website maintenance and online streaming technologies for the University's radio station as a volunteer.

- Significantly improved website user experience by adding features, such as enabling artists and producers to sign up and book appointments for media facility use.
- Developed the station's first mobile app, facilitating global radio streaming and providing access to news and announcements, resulting in increased user engagement. [Link to download.](#)
- Implemented crucial enhancements to the station's digital platforms, contributing to a more streamlined and interactive user experience

SIDE PROJECTS

- **Citardel:** An online digital library providing students access to learning materials. Built with Laravel, MySQL, Tailwind CSS, AWS EC2, and Livewire. Tely App: A mobile app revealing the telecom network of user contacts. Developed using ReactNative and Tailwind CSS.
- **Marble Game:** An offline mobile game inspired by Squid Game, challenging users to guess odd or even numbers. Created with React Native and Tailwind CSS.
- **Cliento:** A full stack application for freelancers to manage projects and clients in a single dashboard. Utilizes Next Js, Tailwind CSS, Laravel, GraphQL, and MySQL.
- **NerdStack:** A Twitter clone for developers with authentication and hierarchical tweet structure. Developed using React Js, Tailwind CSS, Laravel, MySQL, and REST API.
- **Spend Buddy:** A mobile app enabling users to record and track expenses to cultivate a saving culture. Built with React Native and Tailwind CSS.
- **Percampus:** An online marketplace for students to buy and sell used books and items. It was created using Laravel Blade, Livewire, Tailwind CSS, Laravel, and MySQL.

SKILLS/TECHNOLOGIES

HTML & CSS, JavaScript, Reactjs/Nextjs, Tailwind CSS, React Native, PHP, Laravel, Database Management, AWS, Azure platform, Nodejs/Nestjs.
